SECTION 1: RULES AND OTHER GOVERNING PROVISIONS

GENERAL RULES AND REGULATIONS; SPECIAL RULES AND REGULATIONS-LIMITED

ITEM 1000 - DESCRIPTION OF GOVERNING CLASSIFICATION AND EXCEPTIONS

The term "Uniform Freight Classification" when used herein means Freight Tariff UFC 6000-series.

ITEM 1010 - STATION LISTS AND CONDITIONS

This tariff is governed by OPPL 6000-series to the extent shown below:

- A. For additions and abandonments of stations and except as otherwise shown herein, for prepay requirements, changes in names of stations, restrictions as to acceptance or delivery of freight and changes in station facilities.
- B. When a station is abandoned as of a date specified in the above named tariff, the rates from and to such station, as published in this tariff, are inapplicable on and after that date.

ITEM 1020 - EXPLOSIVES, DANGEROUS ARTICLES

For rules and regulations governing the transportation of explosives and other dangerous articles, also specifications for shipping containers and restrictions governing the acceptance and transportation of explosives and other dangerous articles, see BOE 6000-series.

ITEM 1030 - REFERENCE TO TARIFFS, PRICE AUTHORITIES, ITEMS, NOTES, RULES, ETC.

Where reference is made in this tariff to tariffs, price authorities, items, notes, rules, etc., such references are continuous and include supplements to and successive issues of such price authorities and reissues of such items, notes, rules, etc.

ITEM 1040 - TERMINAL OR TRANSIT PRIVILEGES OR SERVICES

1. Shipments made under the rates contained in this tariff are entitled also to terminal and transit services and privileges, and are subject to the charges, allowances, rules, and regulations legally applicable thereto.
2. When such charges, allowances, rules, or regulations are provided for in separate price authorities; corresponding or conflicting provisions contained in this tariff will not apply.

ITEM 1050 - CONSECUTIVE NUMBERS

1. Where consecutive numbers are represented in this tariff by the first and last numbers connected by the word "to" or a hyphen, they will be understood to include both of the numbers shown.
2. If the first number only bears a reference mark, such reference mark also applies to the last number shown and to all numbers between the first and last numbers.

ITEM 1060 - CAPACITIES AND DIMENSIONS OF CARS

For marked capacities, lengths, dimensions and cubical capacities of cars, see Official Railway Equipment Register (RER 6413-series).

ITEM 1070 - NATIONAL SERVICE ORDERS

This tariff is subject to provisions of Tariff NSO 6100-series.

ITEM 1080 - REVISION NUMBERS

This tariff will be amended by reprinting the page and showing a revised effective date. A revised page cancels any uncanceled revised or original pages which bear the same page number.

ITEM 1090 - DEFINITION OF TERMS USED IN CONNECTION WITH CHARGES NAMED HEREIN

COMPETITIVE TRAFFIC - Competitive traffic is where the industry is located on a railroad performing the switching service and such road does itself or in connection with another road or roads, form a route via which local or joint through rates apply under which the switching road may secure a line-haul between the industry and the point of origin or destination of the shipment (SEE EXCEPTION).

EXCEPTION: Provisions of this Item will not apply in connection with the CSXT. (See Item 1330)

CONSTRUCTIVE PLACEMENT – When, due to some disability on the part of the consignor or consignee, a car cannot be placed for loading or unloading at a point previously designated by the consignor or consignee, and is placed elsewhere, it is considered as being under constructive placement and subject to demurrage rules and charges, the same as if it were actually placed at the designated point.

INDUSTRIAL TRACKS - A track serving a particular industry, whether located upon the property of NS or upon property owned or leased by the industry.

INTERCHANGE TRACKS - Interchange tracks are tracks on which cars are interchanged between NS and connecting lines.

INTERMEDIATE SWITCHING - A switching movement between interchange tracks of one carrier to interchange tracks of another carrier within the switching limits of the same station

INTERSTATE TRAFFIC -Traffic moving from a point in one state to a point in another state, or a shipment moving from a point in a state to another point in the same state but moving outside the state while in transit.

INTER-TERMINAL SWITCHING - A switching movement between an industrial track or team track on the tracks of NS and an industrial track or team track on connecting lines on traffic having origin and destination within the switching limits of the same station or industrial switching district. Charges of connecting carriers will be in addition to charges provided herein.

INTRASTATE TRAFFIC - Traffic moving from a point in a state to another point in the same state that does not move outside of the state while in transit.

INTRA-PLANT SWITCHING - A switching movement from one track to another or between two locations on the same track within the confines of the same (single) plant or industry.

INTRA-TERMINAL SWITCHING - A switching movement of traffic originating at and destined to points located on the tracks of this company within the switching limits of one station or industrial switching district.

LINE-HAUL – Movement between stations that are not located within the switching limits of the same station.

NON-COMPETITIVE TRAFFIC - Non-competitive traffic is where the industry is located on a railroad performing the switching service, and such road does not itself or in connection with another road or roads form a route via which local or joint through rates apply, under which the switching road may secure a line-haul between the industry and the point of origin or destination of the shipment. Where reconsigning, stop-off, or transit privileges accorded on other lines prevent NS from participating in the movement as an originating or terminating line-haul carrier, such traffic will be considered to be non-competitive. (See Exception)

EXCEPTION: Provisions of this Item will not apply in connection with CSXT (See Item 1330)

RECIPROCAL SWITCHING - An arrangement between carriers serving the same station or switching district where the carrier physically serving the industry performs switching service for loading or unloading on behalf of the other carrier on shipments having an immediately preceding or following line-haul movement via the other carrier. NS will provide reciprocal switching only to or from NS customers specifically listed in Section 5 of this tariff. Line-haul shipments to or from NS customers not listed in Section 5 must move in NS line-haul service.

TEAM TRACK - A track or tracks assigned by NS for use of the general public. All team tracks are closed to reciprocal switching.

TERMINAL SWITCHING – An arrangement between carriers where only one carrier has access to physically serve the industry and performs the local switching service on behalf of the line haul carrier, unless otherwise agreed upon by both carriers. Interchange shall occur within the switching district.

ITEM 1100 - RULE FOR COMPUTING RATES ON CHARGES PER TON WHEN RATE OR CHARGE IS PUBLISHED PER 100 POUNDS

The rates or charges per 100 pounds will be converted to rates or charges per ton of 2000 pounds and applied per ton of 2000 pounds where provision is made that rates or charges apply per net ton of 2000 pounds and the rates or charges so arrived at will apply per ton of 2240 pounds where provision is made that rates or charges apply per gross ton of 2240 pounds.

ITEM 1110 - NON-APPLICATION OF RATES ON SCRAP AUTOMOBILE BODIES

Charges provided in this tariff will not apply on Scrap Automobile Bodies, crushed flat, loose or in bundles, loaded on flat cars.

ITEM 1120 - SWITCHING CHARGE ON RAILROAD COMPANY MATERIAL

Railroad company material moving via owner line on non-revenue billing between industrial siding served by NS and interchange tracks with connecting line will be subject to the intra-terminal switching charge published in Section 7 of this tariff.

ITEM 1130 - CHARGES ON LOADED AND EMPTY CARS

1. Except as otherwise provided, the charges published in this tariff include:
 - A. The switching of an empty car to be loaded and the return of the same car loaded.
 - B. The switching of loaded car for unloading and the return of the same car empty.
2. Unless otherwise specified, if a car moves fully or partially loaded in each direction, switching charge will be assessed in each direction.

ITEM 1140 - EMPTY CARS RETURNED UNFIT FOR LOADING

When an empty car is received from a connecting carrier for loading by an industry located on the NS, and is refused by the industry because the car is not in proper condition to load and must be returned to the connecting carrier, a charge of **\$450.00** per car will be assessed against the connecting carrier. The charge will be made for one direction only.

ITEM 1150 - TARIFF EXCEPTIONS

This tariff is not applicable and NS will not provide reciprocal switching services for the following:

1. Dimensional shipments;
2. Circus trains or show outfits;
3. Passenger and other railway equipment moving on own wheels. For provisions to apply, see NSRQ 4900-series, NSQ 71118-series for certain machinery commodities, or NSQ 40435-series for railway maintenance machinery.

Unless otherwise specified herein or agreed to by NS, reciprocal switching charges apply to manifest or block service (25 cars or less) only.

ITEM 1170 - ADDITIONAL CUT CHARGES

(See Notes 1 and 2)

At Origin:

The rates on unit train shipments of grain, grain products or soybeans, include the placement of the entire empty unit train in one cut at consignor's facility. When due to consignor's inability to take delivery of the entire train in one cut for loading, any additional cuts provided by NS will be assessed at a charge of **\$8,500.00** per cut which will be in addition to the line-haul charges.

At Destination:

The rates on unit shipments of grain, grain products, or soybeans, include the placement of the entire loaded unit in one cut at consignee's facility. When due to consignee's inability to take delivery of the entire unit in one cut for unloading, any additional cuts provided by NS will be assessed at a charge of **\$8,500.00** per cut which will be in addition to the line-haul or switch charges.

Note 1: Subject to demurrage and storage rules and charges as provided in NS 6004 – Series.

Note 2: A cut is defined as the quantity (one or more) of cars delivered to and removed from the track or tracks of the consignee at destination.

ITEM 1180 - CARS BILLED "TO ORDER", ETC. WILL NOT BE HANDLED IN SWITCHING SERVICE

Cars will not be accepted for handling in intra-terminal or inter-terminal switching service under the provisions of this tariff if billed "to order," "to notify," "order care of," deliver only or surrender of "written order", "original bill of lading," "draft" or any other document.

ITEM 1200 - CARS HELD FOR DIVERSION OR RECONSIGNMENT ON NS

Except as otherwise provided, cars received from and/or delivered to connections, which are held for diversion or reconsignment on tracks of the NS awaiting placement on consignee's private or assigned siding served by the NS, and which are diverted or reconsigned to destinations on roads other than NS beyond the original destination will be subject to reciprocal switching charge, in each direction, between interchange with connections and the original consignee's private or assigned siding. No switching charge will be assessed on the outbound movement when NS is accorded the outbound line-haul movement.

ITEM 1210 - HAZARDOUS WASTE

When switching service provided in this tariff is performed by NS on hazardous waste, the provisions of Tariff NS 6303-series will apply.

ITEM 1220 - SWITCHING WITHOUT CHARGE

No charge will be made for switching carload shipments to or from tracks or private or assigned sidings served by NS or interchange tracks of industries connected with NS when the switching service immediately precedes or follows a revenue line-haul over NS.

ITEM 1230 - CHANGES IN OR ADDITION OF FIRMS OR INDUSTRIES AT STATIONS IN THE UNITED STATES

NS will only switch line haul traffic to or from connections and firms, individuals, and industries on NS named herein. New firms, individuals, or industries which locate on NS will not be subject to reciprocal switching unless and until listed herein.

ITEM 1240 - CAR DEMURRAGE RULES AND REGULATIONS

Except where otherwise provided, all cars handled under the provisions of this tariff will be subject to demurrage and storage rules and charges as provided in Tariff NS 6004-series.

ITEM 1250 - FREIGHT TRAFFIC RECONSIGNED VIA SWITCHING ROAD

When cars are switched from connections, placed for delivery to consignees, and later reconsigned for line-haul via NS, subject to joint through rate from original point of shipment to ultimate destination, the same charge will be made for return of car to terminal yard as for original movement from connecting road, providing specific charge is not already in effect.

ITEM 1260 - DEMANDING PAYMENT ON ORDER NOTIFY OR STRAIGHT BILLS OF LADING SHIPMENTS BEFORE MAKING DELIVERY TO SWITCHING LINES

1. Freight for delivery to a switching connection at destination, whether for public track, private or other siding, when such connection performs switching only, will not be delivered to such connection until all assessed charges are paid (Note 1).
2. When such freight is consigned "Order Notify" or when moving under straight bills of lading which carry a provision (See Section 4, Rule 7, Tariff UFC 6000-series) requiring the surrender of bill of lading, written order, or other document before making delivery (including shipments consigned to one party, notify or advise another party) (Note 2), it will not be delivered to such connection until the bill of lading, written order or other document (or approved security in lieu thereof when the bill of lading has been delayed or lost) has been surrendered.
3. If cars are held for payment of lawful charges or for surrender of bills of lading, pending such delivery, they will be subject to demurrage rules and charges.

EXPLANATION OF NOTES:

Note 1 - If consignees are on the authorized credit list, they will be assumed, for the purpose of this item, to have paid all charges referred to.

Note 2 - Intra-plant, intra-terminal or inter-terminal switching will not be performed on shipments moving under the provisions of this item.

ITEM 1270 - PREPAYMENT OF CHARGES

1. All charges under this tariff must be prepaid or satisfactorily arranged for.
2. No charge of any kind will be advanced on line-haul cars switched to connecting lines nor will line-haul cars bearing advance charges be accepted from connecting lines for handling under the provisions of this tariff.

ITEM 1280 - SHIPMENTS REQUIRING TWO OR MORE CARS

Except as otherwise provided, when shipments are loaded in so called articulated cars (two or more units permanently or temporarily joined together), or when a shipments require two or more cars for transportation, switching charges will be assessed for each car.

ITEM 1290 - SWITCHING SERVICE WHERE NO CHARGES ARE PROVIDED HEREIN

Where no switching charge is provided in this tariff, switching service will not be performed.

ITEM 1300 - NON ABSORPTION OF INTERMEDIATE CARRIER'S SWITCH CHARGE

Except as otherwise provided, when NS Reciprocal Switching Charge is absorbed in whole or in part by a connecting line-haul carrier, and interchange between NS and the line-haul carrier is effected by an intermediate carrier, applicable tariff charges assessed by the intermediate carrier for the switch movement of a loaded freight car from or to the connecting line-haul carrier or for the return of an empty car to the line-haul carrier will be in addition to the NS Reciprocal Switching Charge.

ITEM 1310 - BIRMINGHAM DISTRICT

(Applicable only when specific reference is made hereto)

Birmingham District embraces the following Alabama points reached by rails of NS:

Avondale	Fairfield	Thomas
Bessemer	Grasselli	West End
Birmingham	Irondale	Woodlawn
East Birmingham	North Birmingham	
Ensley	Phoenixville	

ITEM 1320 - RECIPROCAL SWITCHING OF NON-COMPETITIVE TRAFFIC

(Applicable only when specific reference is made hereto)

NS will perform reciprocal switching only on non-competitive traffic as described herein. (See Exception)

Non-competitive traffic is where the industry is located on a railroad performing the switching service, and such road does not itself or in connection with another road or roads form a route via which local or joint through rates apply, under which the switching road may secure a line-haul between the industry and the point of origin or destination of the shipment).

EXCEPTION: Provisions of this Item will not apply in connection with the CSXT. (See Item 1330)

ITEM 1330 - LIMITATION ON RECIPROCAL SWITCHING

(Applicable only when specific reference is made hereto)

A. NS will perform reciprocal switching at origin when:

1. The destination station is a local station on the originating line-haul carrier.
2. The destination station is served by a line-haul carrier whose only interchange is with the originating line-haul carrier.
3. The destination station is not served by NS, but is served exclusively by the originating line-haul carrier and one or more other carriers which also serve the origin.

B. NS will perform reciprocal switching at destination when:

1. The origin station is a local station on the destination line-haul carrier.
2. The origin station is served by a line-haul carrier whose only interchange is with the destination line-haul carrier.
3. The origin station is not served by NS, but is served exclusively by the destination line-haul carrier and one or more other carriers which also serve the destination.

ITEM 1340 - LIMITATION ON RECIPROCAL SWITCHING

(Applicable only when specific reference is made hereto)

A. NS will perform reciprocal switching at origin when:

1. The destination station is a local station on the originating line-haul carrier.
2. The destination station is served by a line-haul carrier whose only interchange is with the originating line-haul carrier.
3. The destination station is not served by NS, but is served exclusively by the originating line-haul carrier and one or more other carriers which also serve the origin.
4. The consignee is closed to NS at destination.

B. NS will perform reciprocal switching at destination when:

1. The origin station is a local station on the destination line-haul carrier.
2. The origin station is served by a line-haul carrier whose only interchange is with the destination line-haul carrier.
3. The origin station is not served by NS, but is served exclusively by the destination line-haul carrier and one or more other carriers which also serve the destination.
4. The consignor is closed to NS at origin.

SECTION 2: ABSORPTION OF SWITCH CHARGES

RULES AND REGULATIONS GOVERNING ABSORPTION OF CONNECTING LINES SWITCHING CHARGES - LISTED ALPHABETICALLY BY STATION

ITEM 2000 – ABSORPTION OF SWITCH CHARGES – GENERAL APPLICATION**AT ORIGIN AND DESTINATION**

Except as otherwise provided, NS will absorb connecting lines' terminal switching and trackage charges, also the charges of intermediate lines, where necessary, on loaded cars originating on or for delivery on connecting lines' tracks on which NS has had or will have a line-haul movement into or out of the point at which the terminal service is performed.

AT INTERMEDIATE JUNCTION POINTS

Except as otherwise provided, the intermediate carriers switching charges at junction points will be absorbed by NS on shipments delivered to connections and charged at joint through rates or charged at rates to such junction points when consigned to destinations beyond.

EXCEPTIONS:

1. The provisions of this item will NOT apply:
 - A. Where a specific absorption rule is published.
 - B. Where price authorities publishing line-haul rates provide that rates are exclusive of switching charges at point of origin and/or destination.
 - C. In connection with switching charges assessed by connecting lines at transit, stop-off or reconsigning point on any traffic held, reconsigned or stopped in transit for any purpose, unless specifically provided for herein, or in price authorities granting the privilege.
2. NS will not absorb any special service switching charges assessed by other railroads.
3. NS will not absorb any switching charges originating or terminating at Port of Indiana.

SECTION 3: SWITCHING LIMITS**DEFINITION OF SWITCHING LIMITS AT SPECIFIC POINTS****ITEM 3000 – SWITCHING LIMITS – GENERAL****APPLICATION**

1. Where the switching limits of a station are specifically defined in this tariff or OPSP 6000-series, the limits so defined include all tracks at such station, including track that may be within the corporate limits of another city, town, village or municipality.
2. Where the switching limits of a station are not specifically defined, the switching limits of such station include track located within the corporate limits of the same city, town, village or municipality.
3. Movements between locations within the same switching limits, as referred to in Paragraphs 1 and 2 will be at the applicable switching charge; line-haul rates or charges will not apply (Note 1).

EXPLANATION OF NOTES:

Note 1 - Line-haul switching rules and charges will not apply on shipments that originate and terminate within the same switching limits.
